

Mobilize Your Enterprise™ is USAT's company motto and their rallying cry. It is a call to action to lead their clients to an effective and profitable mobile communications model. USAT accepts the challenge of being the turn-key partner that can provide end-to-end service in the mobility space.

FOCUS

USAT Seat Mount Solution—CF-29RW

USAT CF-29RW Seat Mount Solution

Designed as a "Workstation on the go", USAT Corporations CF-29RW Seat mount solution is designed for on the go workers who require a stable and portable office solution. The base unit is designed of polyethylene substrate, and consists of a base unit and mounting arm. The RW designates Rugged and Wireless ready, and incorporates the Panasonic CF-29 in-vehicle hot docking station for drop in connectivity to an external WWAN antenna port, serial and USB ports, as well connecting to the vehicles charging system. Additional options include fixed rugged modems, printers and scanners to complete this unique *cost effective* mobile office solution.

Rapid install and user friendly design ~ The base unit rests on the passenger seat, and tucks between the seat and seat back for a secure fit. The seat belt shoulder harness provides extra stability. Workers place a magnetic mount antenna on the roof of the vehicle for superior cellular and GPS connectivity, and are ready to roll in as little as three minutes.

CF-29RW seat mount pictured above includes a laptop dock, adjustable mounting arm, WWAN antenna pass-thru connections, and a DC power adapter. Optional rugged printer and scanner complete the entirely portable workstation solution.

CF-29 Laptop flexibility

Designed exclusively for the Panasonic fully ruggedized CF-29 ruggedized laptop PC, the user is able to utilize their touchscreen enabled Toughbook in an ergonomically friendly position for traditional keyboard access. Additional storage area within the seat mount is perfect for paperwork, folders, printers, scanners, or general storage use. This solution provides instant pass thru connectivity for powering the laptop, WWAN cellular antenna connector, 2 USB 2.0 ports, 1 serial port, and microphone/speaker jacks.

Application Notes:

This fleet vehicle solution is specifically designed for instant deployment into an vehicle type within 3 minutes; and requires no permanent modifications to the vehicle. Common use is found within the Transportation, Field service, Field sales, Insurance, and Utility verticals; but is applicable for any rapid deployment need or when installing into a private or rental vehicle. Optional Scanners and printers are available to facilitate printing of delivery notification or work orders, or when the operational process requires transmission of signed documents back to headquarters for invoicing purposes.
