

## ExpressSHIELD Keeps Your Data Safe

ExpressSHIELD is a content management system for web access through M2M modems, gateways, and routers.

ExpressSHIELD maintains compliance with your acceptable use policy by using content filtering through M2M modems.

## ExpressSHIELD Features

- Category based and site black list based filtering control what sites users are able to access.
- Whitelist, whitelist only, customizable block pages, and customizable category filters optionally available.
- ExpressShield also provides protection by blocking malware, botnets, and phishing. Includes realtime reporting of network activity. Static IP required. 12 month service.
- ExpressSHIELD provides a cloud-delivered network security service, Umbrella, that delivers automated protection against advanced attacks for any device, anywhere.

## THREAT PROTECTION LIKE NO OTHER

Predict and prevent attacks before they happen. ExpressSHIELD not only blocks malware, botnets and phishing over any port, protocol or app, but also detects and contains advanced attacks before they can cause damage.

View new network security activity in real time with globally aggregated reports.

Pinpoint devices infected or users targeted by advanced attacks to reduce the time to remediation.

Comply with internal acceptable use policies or regulatory requirements with up to 60 content categories.
